

Allowing Qwest's request for unregulated DSL pricing would be detrimental to consumers since there is no other DSL provider in the Santa Fe, NM area. Qwest continues to fail to provide service in parts of the city of Santa Fe, NM and has failed to make the capital investments necessary to provide service in other areas where it enjoys a monopoly, after promising to make such improvements in the last round of rate hearings. Qwest needs to be made to perform their current obligations, not encouraged to continue substandard overpriced service.
